Algorithmic trading CONTINUES TO GROW around the world

This represents the trend of this new trading model being widely recognized by the public. Therefore, it is believed that this algorithmic trading model will grow better in the future and **gradually take a bigger market share in the market.**

Algorithmic trading supports a wide range of asset classes, including stocks, futures, precious metals, foreign exchange and fixed income. It is believed that in the near future more investment categories will be introduced, **allowing investors to benefit from the advantages of algorithmic trading to gain profit.**

LOT REBATE ADVANTAGES

PROFITS BY VOLUME

For every trade made by OPIXALGO, regardless of whether it was profitable or not, a cash rebate is received from the forex broker based on the number of lots traded. This profit will be returned to your rebate account.

Investors can earn up to \$18 per lot.

FIRST STEP

Market Depth Analysis & Order Flow Analysis

OPIX ALGO analyzes the market depth volumes, orders and trades provided by our data providers. Entry conditions are reached when rates reach high volume area.

SECOND STEP Execute Hedge Entries

High trading volume means there is liquidity and **OPIX ALGO** will open orders in both directions in the area, going long and short at the same time at the lowest cost. At this point, the account pays a small entry cost without suffering huge slippage.
