BUSINESS OVERVIEW PRESENTATION

OPIXTECH PROFILE

Between the mid-1980s and the 2019 epidemic, we experienced an era of "great moderation" in which economic growth and inflation were both very stable. At that time, we were in a demand-driven economy and supply was growing steadily. When lending rates were too low and the economy overheated or consumption shrank and led to a recession, central banks around the world could raise or lower interest rates to ease the corresponding pressure.

But now, we believe such times are a thing of the past. Continuing the war between Russia and Ukraine has caused a coherent

INFLATION CRISIS

DEBT CRISIS

POLITICAL CRISIS

We are now facing a new environment of heightened macro volatility, with risks coming online and value evaporating in all major financial sectors. Investors remain concerned that the Fed's aggressive path of rate hikes could trigger a recession. The S&P 500 is down 22.44% for the year and the Dow Jones is down 16.57% for the year. Retail investors are much less interested in investing in the market, but we can choose to invest in the market through stable, effective, real, and with a lot of room for future growth ....

IFA Trading Advantages

A Reliable And Regulated Business Partner For The Forex Market

Dual Regulated Broker

IFA holds an Australian financial services license and a Labuan securities license, and has a high level of governance and supervision, including compliance with codes of conduct, dispute resolution and risk management.

Segregated Accounts

In accordance with AFSL, customer funds are required to be held in segregated accounts. This is to ensure that the broker does not have the authority to use those funds for company purposes.

META TRADER 5 PAMM System

The MT5 PAMM account system allows Opix Algo to create investment funds and earn in return for success with investors systematically allocating trading volume.

24/ 6 Service

Outstanding operational and administrative support delivered 24/6 by highly skilled IFA engineers with decades of frontline support experience.

Straight Through Processing System (STP)

IFASTP settlement enables orders to be processed, confirmed, cleared and settled in a shorter time period. Traders are expected to get the most competitive market price, fewer errors and fast execution time.

No Dealing Desk Model Broker

Trades for clients are continuously executed and sent to multiple participants with varying trading interests. IFA has no conflict of interest with client trades.
